IASED • JANUARY 2022

## AEROSPACE

This year, IASSED will organize annual conferences for scientists, researchers, engineers, students, and participants from research centers worldwide to present their research results and exchange new ideas about aerospace technology trends to anticipate in the coming years.

## FORTHCOMING CONFERENCES

---

2022 International Conference  
of Unmanned Aerial Systems  
and Aerospace

---

2022 International Conference  
on Aerospace, Mechanical and  
Mechatronic Engineering

---

# ICUASA 2022

Guangzhou, China on March 26-28, 2022

We welcome you to the website for the International Conference of Unmanned Aerial Systems and Aerospace, ICUASA 2022, which this year will be held in Guangzhou, China on March 26-28, 2022. We are delighted to hold the conference with this magnificent backdrop and encourage you to stay after the conference and enjoy all this part of the world has to offer.

# CAMME 2022

Guangzhou, China on March 26-28, 2022

[WWW.CAMME.ORG](http://WWW.CAMME.ORG)

Contact us: [camme@iased.org](mailto:camme@iased.org)

CAMME 2022 is already growing in popularity with academia, industry, and research institutes, and those submitting papers. Even after a few years, there are researchers that have also been there from the start and carry on as they believe it is perfect for them to disseminate their findings to an erudite peer group. We are lucky this year in an exceptional group of academics that are delivering keynote speeches covering the conference theme in general and leading-edge research. This in itself is a great reason to attend, yet the wealth of knowledge gained from the other papers will equip you even more. Share your research success with your peers and meet new researchers in your fields.
