FORTHCOMING CONFERENCES

Inside this month's issue

As the material precursor for the emerging strategic emerging industries, advanced materials have become the key focus and core technology of international competition. Meanwhile, the development of advanced materials and their corresponding technologies and industries has also being regarded as “national development strategy” for the world’s leading countries and gradually developed into a new “trump card” in the game between countries. Intelligent manufacturing, with the most technological innovation value, is along with a high-level knowledge and technology in the equipment manufacturing industry, a high-degree of integration and application on core technologies, new materials and components. What’ more, intelligent manufacturing embodies the comprehensive strength of scientific and technological innovation ability, manufacturing technology level and international competitiveness.

MEAMT 2022

2022 6th International Conference on Material Engineering and Advanced Manufacturing Technology (MEAMT 2022) will be held in Nanjing, China on 23-25, September 2022.

NANOMT 2022

2022 International Conference on Frontiers of Nanomaterials and Nanotechnology will be commenced by creating an amalgamated global platform for a common purpose of identifying the challenges and issues in Nanomaterials and Nanotechnology and sustainable methods to solve the particular issues by their combined research findings.

ICFMCE 2022

2022 5th International Conference on Functional Materials and Chemical Engineering is dedicated to providing the platform and opportunities for researchers, scientists and delegates from communities of different areas to exchange and share their experiences and discoveries, discuss practical issues and challenges encountered, explore applications and solutions in the common research field of Functional Materials and Chemical Engineering.
