ICBICC 2023

ICBICC 2023 aspires to craft an all-encompassing platform that beckons esteemed researchers, engineers, and industry professionals from across the globe. Together, they will illuminate the forefront of pivotal trends in the realms of big data, IoT, and cloud computing. The three-day symposium will encompass a rich tapestry of intellectual engagement.

NEW ERA LEARNING

We wholeheartedly extend an invitation for the submission of original papers, abstracts, and posters for peer evaluation, culminating in the opportunity for their presentation at the conference.
